ART ✧ PEOPLE ✧ LIGHT ✧ EMOTION

GALLERY ECHOES

collective emotional artwork

PROJECT OPPORTUNITY

SOCIAL + MOBILE GALLERY EXPERIENCE

Gallery visits are both social and personal. Visitors want to see other views while keeping their own pace, focus, and interpretation.

How might we support low-pressure social connection while keeping the artwork central?

WHAT WE DID

2026

Research Methods
Literature Review·Culture Probe·Visitor Interviews

Research Synthesis
18 initial codes → 5 themes

Key Themes
Social connection without losing personal pace
Space and environment shape the visit
Useful information, without overload
Participation can feel awkward
Technology should help, not distract

Design Principle
Keep the artwork central.
Make participation optional and low-pressure.

DOMIN

Elevating engagement through artworks as catalysts

DESIGN RESPONSE

Gallery Echoes turns personal responses into subtle visual and physical feedback.

INITIAL CONCEPT

LOOK → CHOOSE → RESPOND → CONNECT

Artwork → Personal response → Visual Echo → Discover perspectives → Ambient Footprint

Personal responses become anonymous visual traces, allowing visitors to discover other perspectives without interrupting their own gallery experience.

SOCIAL & MOBILE

Designed to connect visitors through anonymous responses and optional sketch browsing, while preserving personal pace.

Visitors move between artworks and turn a colour selected on their phone into a portable light response.

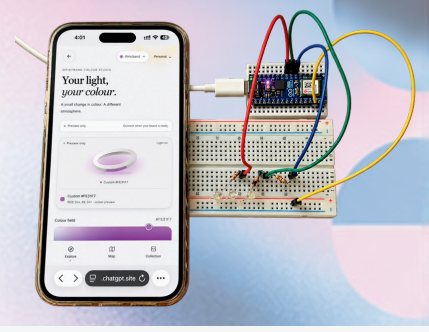

CHOOSE·CONTRIBUTE ·SEE IT GLOW

PAIRING
Keep the artwork central.
Make participation optional and low-pressure.

Connected
A steady light confirms successful pairing.

Artwork Interaction
A quick light pulse confirms a successful interaction.

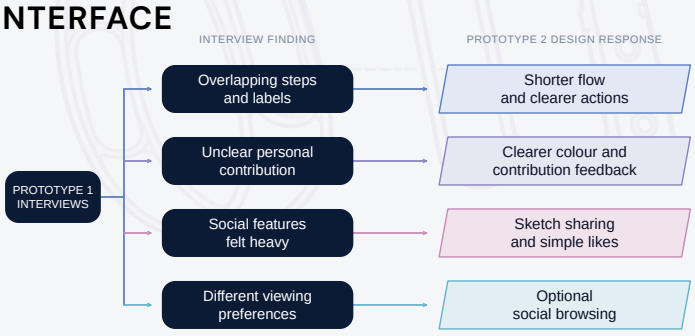

Pair → Connected → Artwork Respnse

DESIGN ITERATIONS

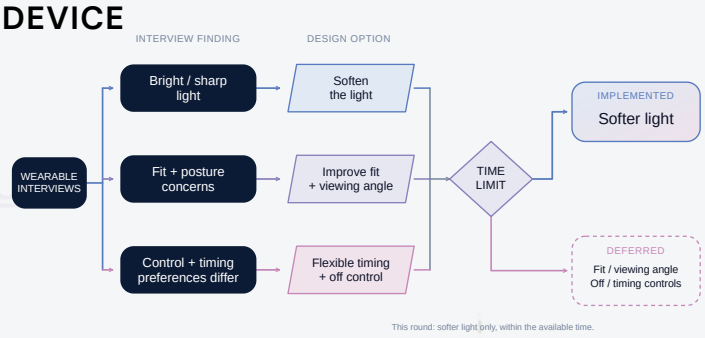

COMPLETED DEMO: PHONE COLOUR → WI-FI → RGB LIGHT

INTERFACE

Prototype 1 feedback shaped a clearer flow, more visible contributions, simpler sharing and optional browsing in Prototype 2.

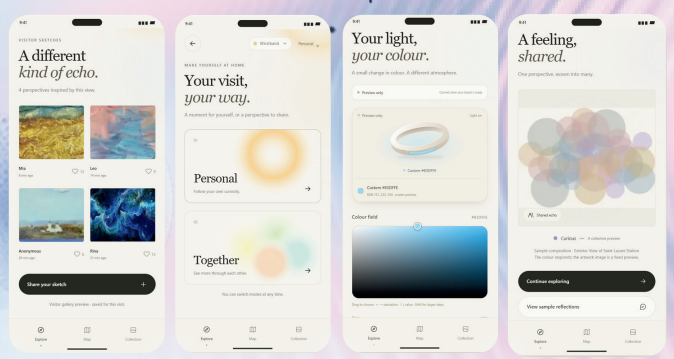

DEVICE

Wearable interviews informed several refinements; time constraints limited this iteration to softer light, with other changes deferred.

ONE ARTWORK, MANY PERSPECTIVES

Each artwork gathers many anonymous responses.
Visitors can explore different views at their own pace.

Explore the prototype here!

PERSONAL COLOUR → COLLECTIVE TRACE

A chosen colour expresses a visitor's interpretation.
Individual responses build a shared visual trace.

CONCEPT PREVIEW
Individual colour responses are imagined as a shared visual trace over time.

INDIVIDUAL RESPONSE
One Visitor, one colour trace

LAYERED TRACES
Many visitors,accumulating over time.

COLLECTIVE VISUALA
shared trace emerges.

ANONYMOUS · ASYNCHRONOUS · LOW–PRESSURE
Shared traces accumulate without requiring direct interaction.
